

*The **TPS** Advantage!*

TOKYO KEIKI POWER SYSTEMS

Company profile

TOKYO
KEIKI

The TPS Advantage!

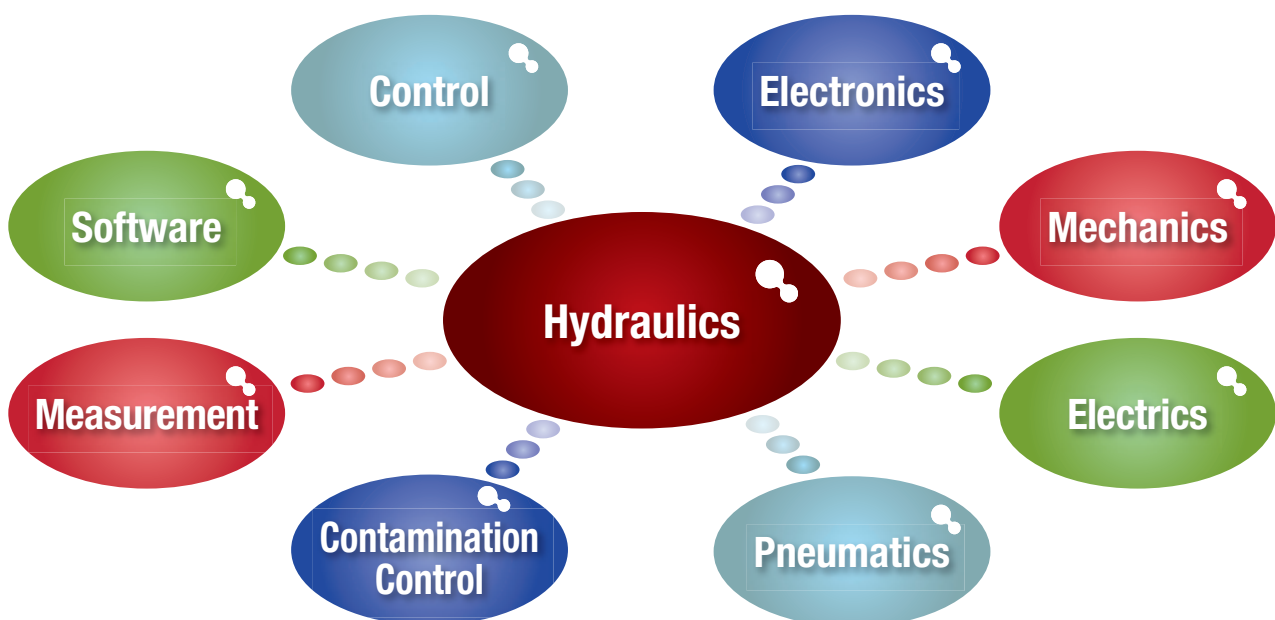

- More than 40 years in business as the industry leader in custom systems
- Unrivalled quality & reliability
- Single source, total system solutions
- State-of-the-art products & systems that meet customer needs for energy-saving, space-saving, labor saving, efficiency, environmental compatibility, convenience and ease-of-use
- Commitment to customer satisfaction and product excellence based on a depth of capabilities and technologies

Specializing in:

- ▶ Power units, valve stands, actuator systems
 - ▶ Electronic control systems
 - ▶ Turnkey systems & projects
- We provide products and systems for a wide range of industries and applications as well as systems of all sizes, from small to very large (e.g. 20,000 L, 800kW), which include:
- ▶ Industrial machinery (incl. machine tools, injection molding, press, conveyance, etc.)
 - ▶ Power generation, steel making, waste processing
 - ▶ Dam gates & other government projects
 - ▶ Marine equipment & systems
 - ▶ Inspection & testing systems

TPS, your one-stop choice for the best in custom systems!

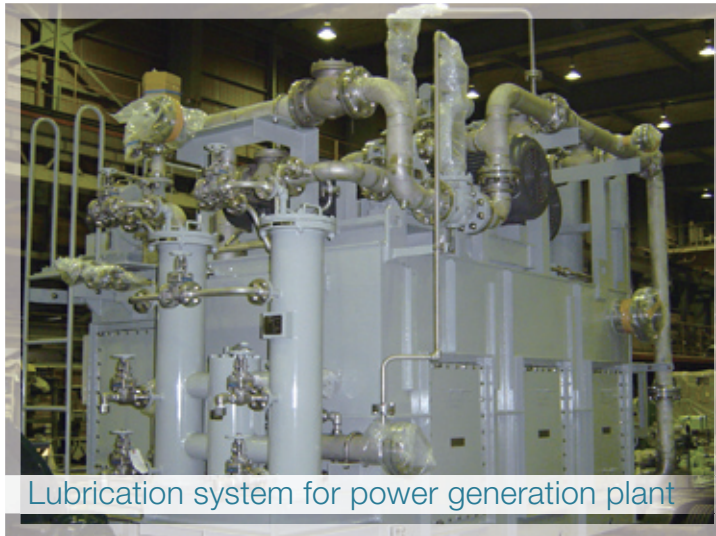

Core Technologies & Competencies

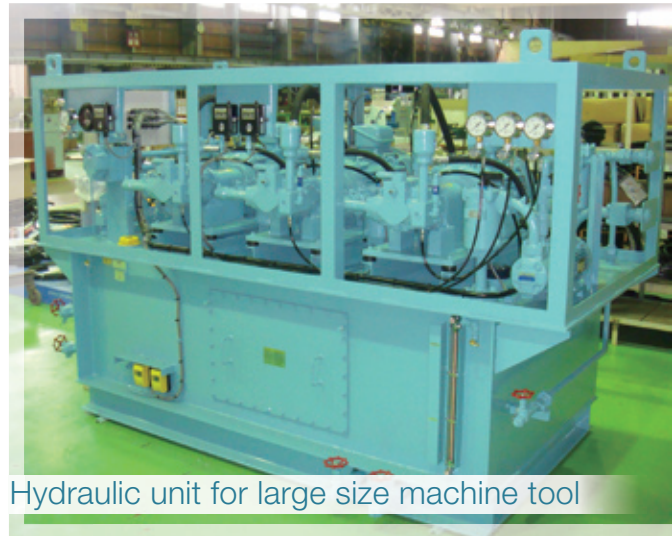

Total systems provider

- Located in Tochigi Prefecture, Japan, Tokyo Keiki Power Systems (TPS) is a full spectrum supplier of custom systems which are designed and built in our modern 6,000 sq. meter facility with an engineering and production staff of 60.
- Our mission is to offer quality and reliable solutions that draw upon our wealth of experience and knowhow, the wide range of technologies at our disposal, and the best in modern design and fabrication practices. Our goal is to continue to build on these strengths to achieve first tier status as a trusted worldwide provider of custom systems.
- Leveraging our core technologies, we embrace a total systems approach which includes design, engineering, fabrication, and related services with a dedicated and certified team of design engineers and manufacturing experts who work closely with customers each step of the way.
- Through these efforts, TPS has advanced the art of system design and manufacture, achieving in the process a distinction for quality and reliability that is validated by our success and reputation as the “GO TO” source for custom systems.

Lubrication system for power generation plant

Hydraulic unit for large size machine tool

Hydraulic training simulator

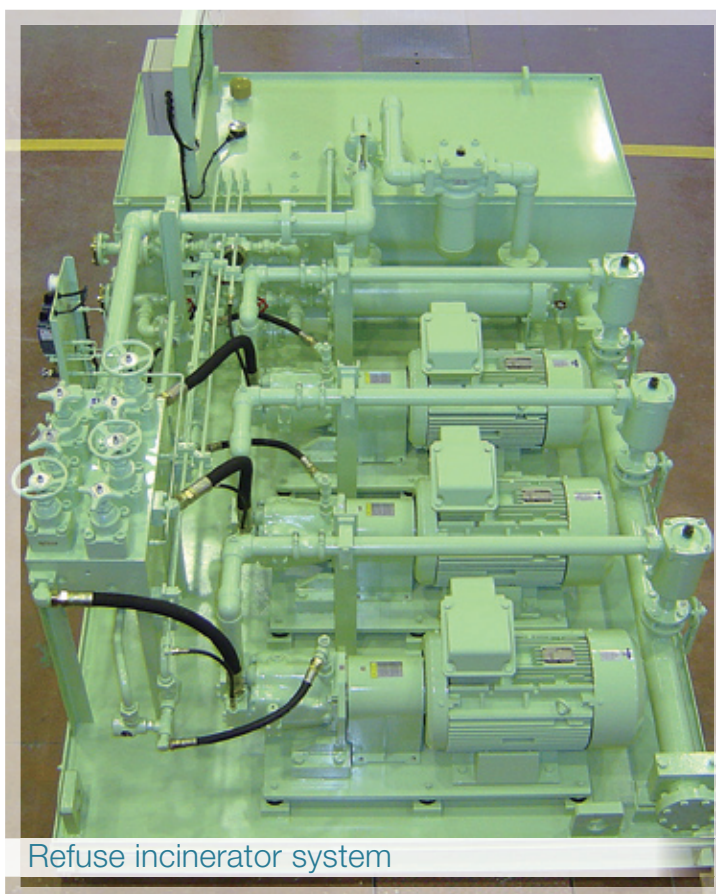

Chemical tanker submerged pump control panel

Sintered metal press hydraulic system

Hydraulic pump test system

Refuse incinerator system

Chemical tanker submerged pump hydraulic system

Dam gate hydraulic system

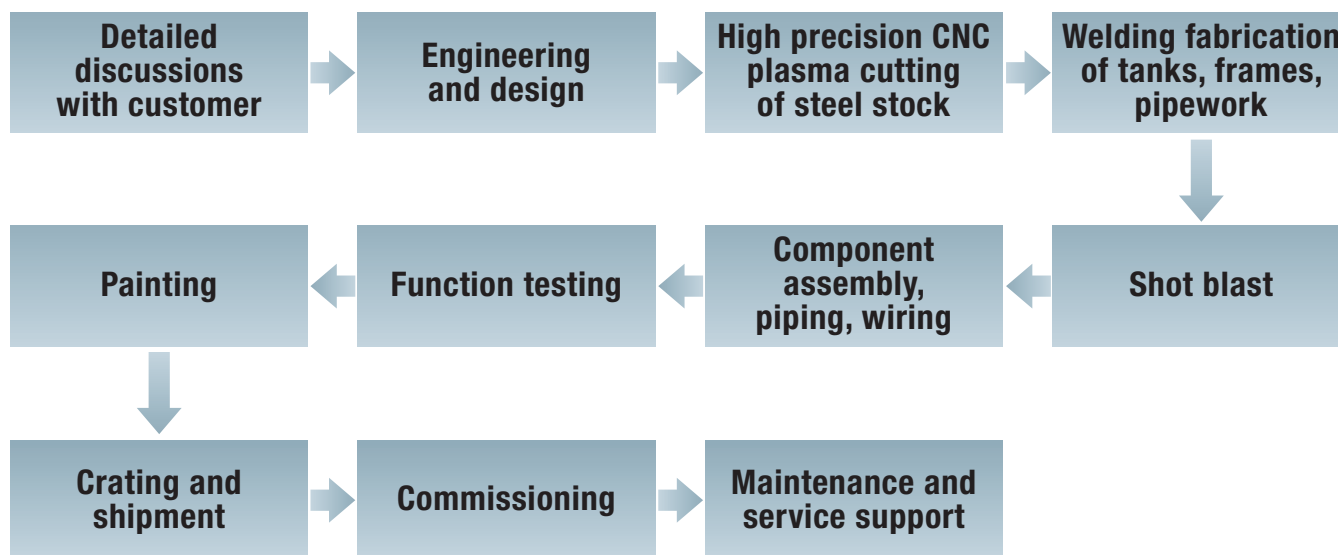

Interior of dam gate hydraulic unit

**"Quality and Reliability are what we stand for"
The TPS Team**

TPS is a comprehensive, full service custom systems provider.
We work closely with customers each step of the way, providing complete state-of-the-art engineering & design, manufacturing, and support capabilities.
